Re; Future Wave Installation at Seaforth Resort

Peter,

Just an update on electrical savings at Seaforth Resort Alex Beach.
As I had informed you recently the Lap Pool has 3 Future Wave energy savers fitted to filter and waterfall pumps in that area. The Manager Scott has indicated a drop of up to **\$1000.00 per month** in that section of the complex for its electrical bills.

As the entire resort was divided in to several Body Corps, it is now amalgamating into one Body Corp. Electrical bills have been totaled for the whole complex and found a **reduction by around \$35,000.00 for the year** from the previously year.

We have a total of 12 – Future Wave units fitted for the last 9 – 10 months!
There have been no other changes to the complex in regard to power in that time other than the Future Waves. The Body Corp obviously is happy as it shows their investment has paid itself of in much less than 12 months.

We have also found the water quality of the pools, which include a 700kl Lagoon Pool and a 230Kl Lap Pool, have been much higher.

If you require any further information please contact me on 0412327731.

Regards
Duane Fischer
