## EVO:S SERIES SAND FILTERS

The EVO:S series will provide perfectly clean, clear and sparkling water for many years. The EVO:S sand filter perfectly matches the higher output of Noria POD pumps providing a supreme choice for pool equipment.

The spun fibreglass tank provides larger capacity and higher flow rate enabling more effective filtration – reducing running time and costs. The unique design of the EVO:S provides unrivalled strength and durability to ensure maximum life and trouble free operation making it perfectly compatible with in-floor cleaning systems.

Clever engineering means the 6 position multi-port valve perfectly aligns and fits

without special tools, and the filter has self-sealing barrel unions. These unions make inspection or changing of the filter media user-friendly.

Backwashing of the EVO:S takes mere minutes due to the intelligently designed laterals which ensure water flow is swift and the filter media cleaned quickly and effectively.

The EVO:S sand filter is part of a range of intensively researched, high quality, connected products that work in harmony to ensure the pool or spa is easy to maintain and ready for use at any time.

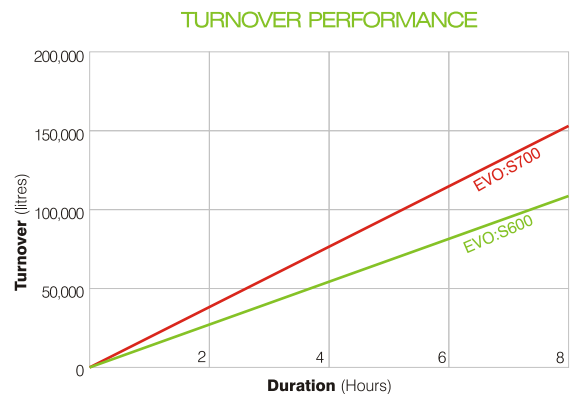

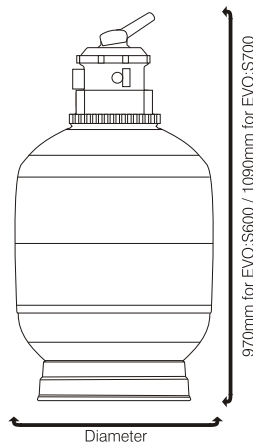

## SPECIFICATIONS

Product	Diameter	Flow Rate*	Sand Capacity	Zeolite Capacity
EVO:S600	600mm	240	140kg	105kg
EVO:S700	700mm	320	180kg	140kg

\*Flow rate is measured in litres per minute

## WARRANTY

Each filter is covered by a limited 10 year warranty on the tank and a 12 month warranty on the valve and internal components. The instruction manual that accompanies the EVO:S sand filter provides more information.
